

How many rights are you going to try to take away from us? First you take away free speech on radio, but that is not the issue here. As a taxpayer shouldn't you have the right of wanting to be bothered at dinner time. I don't want to be bothered by people calling me daily asking me if I want a credit card. I have plenty if I wanted more I would go on the web. If I want someone to contact me, I will give them my number. I do not want my number going out to people who are not only wasting my time but theirs as well. Thank you
